

POISON IN THE AIR

Analysis of Air by the Board of Health.

METHODS OF RESEARCH.

Air in Schools, Public and Private.

Air in Theatres in New York and Brooklyn.

HIGH TEMPERATURE MET WITH.

Air in Hospitals, Halls, Court Rooms, &c.

The Dust We Breathe—Its Microscopic Appearances.

The following highly interesting document has been prepared, through much exhaustive labor and elaborate research and scrutiny, by Dr. R. C. Sims, Assistant Sanitary Superintendent, Brooklyn, and submitted to Sanitary Superintendent Harris, of the Metropolitan Board of Health. It will supply ready medical periodical and consideration:

REPORT ON THE SOURCES OF UNHEALTHFULNESS IN SCHOOLS, ASSISTANT'S OFFICES AND PLACES OF POPULAR AMUSEMENT AND RECREATION IN THE METROPOLITAN DISTRICT.

The evils introduced by which health is destroyed

are the most gradual and cumulative in their

nature. Although nature guards life, with many

peculiar devices, yet often the most imperceptible

and gradual evil can easily be detected, and

the most insidious is the slow but sure

destruction of the body.

It is the gradual and insidious

processes of disease which are the most
